

## Ascend Rehab Services

Ascend Rehab took the help of Evonence to manage the migration of their users and data to Google Workspace and also offered Google Workspace skills training and Admin training attended by IT team and continues to provide ongoing technical support.

### The challenge

Dealing with a rapidly changing and exponentially challenging healthcare industry, Ascend Rehab required a better connected, more collaborative environment for their employees to better serve their patients while also meeting HIPAA security benchmarks.

### The solution

Migrating to Google Workspace reduced the time and costs that come with managing complicated legacy licensing and also boosted security for sensitive data. At Ascend, the move to Google Workspace means the hospital can continue to deliver high-quality healthcare, bolstered by the latest technologies.

### The results

Google Workspace allows Ascend Rehab to easily scale, support, and collaborate with its growing team. Built in HIPAA compliance ensures that all sensitive patient information is protected while also bringing agility and ease of use to day-to-day tasks such as mail, voice and video chat, and document collaboration.

“ The Evonence team was very efficient in their engagement with us and made it really easy for us to transition and implement Google Workspace without any hiccups or interruptions to our operations. We are very thankful for their assistance with this implementation and their wonderful job in the smooth transition. A huge thanks from the Ascend Rehab team! ”

Rakesh Shah, IT Managar, Ascend Rehab Services
