

TerryTown RV

Engaged Evonence for workspace migration, change management and improving employee productivity through workspace tools.

The challenge

For Terrytown RV, company data was scattered across the multiple dealership locations; being stored on multiple personal Gmail accounts and on local file servers without any kind of control. Company information was stored and shared from personal Gmail accounts exposing them to significant data risk. If an employee left, there was no way for the IT team to recover the data after their departure.

The solution

With Google workspace, Terrytown was able to provide their workers with the same tools they were familiar with and also take control of all the company data inside a single collaborative platform. They were able to keep track of all the activities happening with this platform using Google Workspace admin tools.

The results

Reduces IT costs by 25% compared to the previous hosting company by using a single solution. Improves employee productivity via collaborative editing and mobile file management. Simplifies the onboarding process through employees' existing comfort with Google Workspace. Improves team administration through Calendar events and Google Workspace permissions management.

“ Email is a vital part of our business these days. It was quite overwhelming to think about changing email providers, but our previous provider was not reliable and didn't offer many of the features we needed. Evonence guided us throughout the process and made sure we had all our needs met. My expectations were exceeded. Thanks again! ”

Todd Doctor, TerryTown RV

About Terrytown Rv

Opened in 1973 in a barn on the north side of Grand Rapids, Michigan, by founder and current company president Tom Selvius, TerryTown RV now consistently ranks among Michigan's top volume RV dealers year after year.
